Race Ramps Introduces New Products at SEMA360

Made in the USA manufacturer designs three products for general servicers, builders, and restylers.

ESCANABA, MI – Nov. 1, 2020 – Race Ramps, manufacturer of lightweight ramps and accessories for working on low-clearance vehicles, introduces three new products at SEMA360. Made in the USA, Race Ramps' products are manufactured with their exclusive patented process that provides safety and durability when working with or on vehicles. Designed for custom builders, restoration, general auto maintenance and the graphics/restyling segments, Race Ramps' new products are the lighter and safer solution that provides increased accessibility to under and around vehicles. All new products will be available starting Nov. 1, 2020.

Portable Pro Lift Drive-Up Ramps

SKU: RR-PPL

MSRP: \$1,299/set

A new innovative design that is based on Race Ramps' Restyler Ramps and Portable Pit Stop Ramps, the Portable Pro Lift Ramps are a convenient drive-up ramp system that provides a gentle six-degree angle of approach with an eight-inch full vehicle lift. The multi-piece set-up allows for easy portability and maneuverability whether in the shop, garage, or transported to work on vehicles trackside.

The Portable Pro Lift Ramps can accommodate vehicle's up to 6,000 lbs. and is suitable for tires up to 12-inches wide. The ramps are constructed with Race Ramps' 100% solid core technology and is coated with a durable non-skid, non-slip coating.

10" High Crib Cruisers

SKU: RR-CC-10

MSRP: \$235/set of 4

The 10" High Crib Cruisers are an innovative design that takes the popular standard Wheel Crib concept and enhanced with a contoured bottom half that is conducive for use with hydraulic

wheel dollies. When in-progress project vehicles need to be moved around a shop or garage, the Crib Cruisers provide the flexibility in keeping a vehicle lifted while working in conjunction with a wheel dolly in being transported from one location to another. Hydraulic wheel dollies can gently “scoop up” the Crib Cruiser for stable travel. The Crib Cruisers accommodate 1,500 lbs per crib, for a total of a 6,000 lb. overall vehicle weight capacity. The Crib Cruisers are for use with tires up to 12 inches wide and 24-30” in diameter.

14” High 2-Pc Supercar Wheel Cribs

SKU: RR-WC-14-SC-2

MSRP: \$250/set of 2

Wheel Cribs provide a safer approach to working around and underneath vehicles. Currently offered Wheel Cribs range from 8-12 inches in height. To provide more lift with stability, the adjustable 14” High 2-Pc Supercar Wheel Crib accomplishes both goals.

The two-piece version allows for the option to use just half of the Wheel Crib, or for vehicles with stiff suspension, the process in getting the vehicle on the 14” tall crib will be assisted when completed in an incremental two-part process.

The extra-wide 16-inch base provides stability given the 14 inches of lift. Vehicles with extra-wide tires will be more secure with the larger product footprint. The Wheel Cribs accommodate 1,500 lbs per wheel for a total overall vehicle weight capacity of 6,000 lbs.
