**Black Widow® Introduces New RV Motorcycle Carrier**

*Heavy-duty steel, hitch-mounted carrier designed and tested for RVs handles motorcycles up to 600 pounds.*

**GERMANTOWN, WI** – April 27, 2022 – Black Widow®, manufacturer of quality, affordable utility products for the powersports market, introduces a new motorcycle carrier designed and tested specifically for RVs. Capable of securely transporting bikes up to 600 pounds, the RV Motorcycle Carrier includes both a 2” and 2.5” hitch tube, along with an anti-rattle device and hitch pin to match the RV’s hitch.

Born out of popular demand, this is the first Black Widow carrier tested to withstand the vibrational forces created by an RV in motion. “Our customers continually asked for an RV motorcycle carrier,” said Jennifer Thielen, Merchandiser for Black Widow, “and we delivered one that can be used on RVs with either a 2 or 2.5” hitch. We also took traction into consideration with a coarse grit-paint coating on both the ramp and carrier track.”

**Black Widow® Steel RV Motorcycle Carrier**Part #: [RV-MC-CARRIER](#); MSRP: \$439.99

Manufactured from heavy-duty steel, the Black Widow RV Motorcycle Carrier is equipped with a 72.5” long loading ramp with diamond-plate traction that is enhanced by the thick, coarse grit-coat that grips tires while loading or unloading. It hooks onto to the right side of the carrier track with two welded pins. On the left side of the track, an adjustable wheel chock secures wheels up to 7.25” W.

Reinforced, integrated eyelets on the carrier provide convenient tie-down points for motorcycles. When installed on a 2” hitch, it holds dirt bikes and smaller motorcycles up to 400 lbs.; when installed on a 2.5” hitch, it accommodates larger motorcycles up to 600 lbs.

With a variety of styles and capacities to choose from, Black Widow offers a range of hitch-mounted truck and van motorcycle carriers in addition to the new RV motorcycle carrier, all designed to fit the needs of customers. From short trips to seasoned cross-country expeditions, Black Widow carriers keep motorcycles safe and secure in transit.

Disclaimer: Never exceed the maximum tongue rating of your trailer hitch and be aware that your hauling weight may be limited by your vehicle's suspension. Some vehicles may require air shocks or heavier springs to stiffen up the suspension and prevent sagging. Carriers are not recommended for

hitches less than 12" from the ground to the bottom of the hitch. Hitch adapters are not recommended for use with this product.

**About Black Widow®**

Black Widow, a division of MOTIS Brands™, manufactures a selection of loading, transporting and maintenance solutions for motorcycles, ATVs, UTVs, and PWCs along with snowmobiles through its Black Ice line.
